Thank You Pictou County for raising over \$163,000!

The world may be experiencing a financial crisis, but that certainly hasn't dampened the enormous generosity of Pictou County. For the 15th year, our immense gratitude goes out to all of those who participated in or donated to the Scramble. This year we managed to raise over \$163,000! Community is what Summer Street is all about, and each year your generosity and the Scramble's success demonstrate what an outstanding community we live in!

Why your kindness is so valuable

When you support Summer Street you become actively involved in broadening the horizons of adults with intellectual disabilities. We work together to understand interests, goals and aspirations. Then we explore different avenues that have the potential of moving dreams toward reality. If you drop by Summer Street today you might find people working in one of our small businesses; learning in the computer lab; painting or playing music; answering phones in the office; or participating in an Employee Council meeting, perhaps discussing the rights of people with intellectual disabilities. No doubt you will also see us working in businesses throughout Pictou County. Your involvement and support are helping Summer Street continuously raise the bar and operate as one of the most progressive and successful organizations of its kind. Thank you Pictou County!

2009 Scramble Community Champions

We would like to thank and salute every single golfer who participated in this year's Scramble. Your continued support and generosity are simply amazing. We would like to express special thanks to our top fundraisers Howie Anderson of CIBC Wood Gundy and his team, who raised \$23,275. Also very special thanks to our top individual fundraiser, Craig Fraser who raised \$21,250.

Thank you very much to all of our sponsors. All expenses associated with the Scramble are paid for by our sponsors which means that every dollar raised through pledges goes directly to support Summer Street's mission:

We help people with intellectual disability define their personal goals through exposure, experience and education.

We work together to achieve these goals by:

- providing academic, life skills and vocational training
- employing people through Summer Street business ventures
- facilitating employment opportunities in the community

We partner with people with intellectual disability, those closest to them and the community to provide enrichment and opportunity for all.
